T: 214.740.4025

F: 214.692.6255

Brett Pinkus is a litigator and intellectual property attorney who brings a wealth of technical and legal experience to the Firm's clients. Throughout his career, Brett has handled all aspects of obtaining, enforcing, and defending intellectual property. Brett's practice primarily focuses on patent, trademark, and trade secret litigation. He has represented clients in cases in federal district courts throughout the country, appeals to the Federal Circuit, and post-grant proceedings before the U.S. Patent and Trademark Office, such as Inter Partes Review (IPRs). Brett is also a registered patent attorney who routinely handles patent preparation and prosecution, patent opinions, portfolio development, acquisitions, and licensing and technology agreements.

Brett's cases have spanned a vast array of technologies, such as medical devices, surgical implants and instrumentation, semiconductors, manufacturing, materials, chemicals, automotive components, printers, RFID, sporting equipment, motion tracking, optics, lasers, signal processing, digital image processing, software, gaming, and Internet and e-commerce applications.

Brett gained invaluable technical experience as an aeronautical engineer designing and testing aircraft structure, hydraulic and electrical systems, and stealth-enhancing aircraft features. That hands-on knowledge and the training received through his mechanical engineering degree enhances Brett's legal work and allows him to provide a real-world understanding of the complexities of his clients' products, services, and technology.

Representative Matters:
